NOAAWatch is a website offering information about ongoing environmental events. NOAAWatch explains the role of NOAA in prediction, monitoring, and recovery from environmental hazards. It provides public access to current information on a number of environmental threats ranging from oil spills, to hurricanes and tsunamis, to space weather.

The National Hurricane Center issues Public Advisories on their website for active tropical cyclones every six hours at 5 a.m., 11 a.m., 5 p.m., and 11 p.m. EDT. When coastal watches or warnings are in effect, Intermediate Public Advisories are issued at either two or three hour intervals between the regular Public Advisories. Special Public Advisories may be issued at any time to advise of an unexpected significant change in the cyclone or when watches or warnings are to be issued.

NOAA Weather Radio

Not manufactured by NOAA, NWR receivers can be purchased at many retail outlets and on the Internet

NOAA Weather Radio (NWR) All Hazards is a nationwide network of radio stations broadcasting continuous weather information directly from a nearby National Weather Service office. NWR broadcasts National Weather Service warnings, watches, forecasts, and other hazard information 24 hours a day.

Citizens with Special Needs

Citizens with disabilities and special needs should be especially vigilant as they plan for emergencies and evacuations. Planning ahead is the key.

Talk to neighbors, family or caregivers about how to protect your home and belongings from wind and water damage. If appropriate, talk to your doctor about your plans for dealing with an emergency.

Review Hurricane Preparation Checklists and consider any additional needs you may have, e.g., batteries for hearing aids and similar devices, backups for medical equipment and special dietary requirements.

In addition to gathering your medications, make a complete list of all your medicines and the doctor prescribing them to take with you when you must evacuate. You should be prepared to survive for at least three days if an emergency occurs. Plan for the care and housing of your pets. **Plan your evacuation.** Know where you are going and how you will get there. Make your plans known to those in your support network, including a point of contact outside your area that you can contact with your evacuation information. Allow adequate time to ensure you reach safety well ahead of the storm.

Stay informed about what is happening and what public officials are asking citizens to do. Be prepared to follow their instructions.

If you know of friends, neighbors or a family with disabilities or special needs, talk to them about their plans and ensure that they are safe in case of a natural or man-made disaster.

Don't be afraid to ask for help if you need it. Contact your local emergency management office.

Additional information on preparedness is available at:

**www.scemd.org or
www.fema.gov.**

Whether you are told to shelter-in-place or evacuate, having a plan and being ready are the keys to safety.
