MEMORANDUM OF UNDERSTANDING
BETWEEN
THE STATE OF SOUTH CAROLINA
AND
THE SOUTH CAROLINA AMATEUR RADIO EMERGENCY SERVICE

I. PURPOSE

The purpose of this document is to state the terms of a Memorandum of Understanding (MOU) between the South Carolina Emergency Management Division (SCEMD) and the South Carolina Amateur Radio Emergency Service (ARES), that will serve as a guide within which volunteer personnel of the ARES may coordinate their services, facilities, and equipment with SCEMD in support of State and local emergency communication functions. Joint coordination and exercise of the resources of SCEMD and ARES will enhance the posture of emergency communication readiness in South Carolina.

II. AUTHORITY

This MOU is made under the authority of 24 SC Ann Regs 58-101 (A)(1)(1980). Under this provision SCEMD may, by agreement or operation of law, charge persons or groups with duties incident to the protection of life and property within the state during an emergency. ARES is a volunteer program sponsored by the American Radio Relay League, Incorporated. Nothing herein will, nor will it be construed to, bind the American Radio Relay League, Incorporated in any respect whatsoever.

This agreement will be governed by and construed in accordance with the law of the State of South Carolina, and as applicable, the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission governing the Amateur Radio Service.

III. RECITALS

WHEREAS, the South Carolina Emergency Management Division has statutory responsibility under SC Code §25-1-420 to prevent, minimize, repair, injury and damage resulting from any type of disaster.

WHEREAS, ARES and RACES are separate entities operating under separate auspices and regulatory provisions.

WHEREAS, the ARES is an organized group of radio amateurs in South Carolina operating as volunteers, and as part of the field organization of the American Radio Relay League, Incorporated (ARRL), pursuant to procedures established by ARRL, and because of its emergency communication capability can be of valuable assistance in providing essential communications during emergencies and disasters when normal lines of communication are disrupted.
